**Subject:** Bicentennial School: Capital Projects

Families,

I am writing to let you know that we are making some building upgrades to Bicentennial School over the coming months.

New exterior walls facing Victoria Road and Thistle Street will be constructed in order to install new windows. Heating systems will also be upgraded in these classrooms.

Work will also include reconfiguring a former home economics space into a food studies lab.

The work has started and is expected to be completed in March 2023.

Please be assured that when school is in session, all work will take place after hours.

Sincerely,

Kavita Khanna  
Director of Operations Services  
HRCE

Cc: Trevor McGowan, Principal, Bicentennial School
